

At the Southbroom Surgery we look to support our patients with their caring role.

You are a carer if you look after or help a family member with a diagnosed condition. This could be a physical condition, a mental condition or substance misuse. You can become a carer or young carer by completing one of our forms.

We recognise that it is difficult to book appointment at a time that suits your needs, and we understand that it can be difficult to talk about your cared for person in front of them. We also recognise that it is important for carers to remember their own health is important too.

Becoming a registered carer with us at the Surgery gives you access to the following benefits:

- A seasonal Flu vaccination
- Dedicated carers health checks
- A carers email address for the surgery
- Carers leads for you to speak to
- Arrange appointments around your carer commitments.

If you have any questions, please contact the surgery and ask to speak to Gema or Dawn who are the Surgery carer leads.
